App Description

Form Description

When gathering bid information from specialty contractors, an estimator wants bid prices broken down into itemized costs. He looks at the breakdown to see exactly what each bidder is offering to do, and for how much. When bids include alternatives, substitutions and exclusions it makes them difficult

The Bid Comparison Sheet is invaluable when considering bids for several subs. It is set up to show itemized costs when the bid includes alternatives, substitutions and exclusions. It also comes in handy when specialty contractors call in bids and will apply to most specialties, from tile to flooring to electrical to painting.

Bid Comparison Sheet -

to compare. But when you list all the details of all the bids for a particular portion of the job in one app you can see and easily compare what each bid includes and excludes, what alternatives are being offered and the price.

When to Use It

Form Purpose

With this app you have all the details of all the subcontractor bids for a particular part of a project. Since subs often include and exclude different items on their bids, or offer alternatives, having them all listed in one place makes it easy to compare apples to apples.
